

Affordable worldwide coverage for your MagnaStar®

Introducing the AirCell ST 3120 worldwide Satcom.

An affordable Satcom solution that expands the capabilities of your MagnaStar phone, our new ST 3120 Iridium® Satcom Transceiver provides two channels of worldwide satellite voice and data communications. A compact unit that's easy to install, the ST 3120 interfaces with your existing transceiver and existing cabin equipment.

Other benefits include simultaneous ground/satellite network operation, access to voice, data and information services, and rates as low as \$0.99 per minute, so equip your current phone with the ST 3120 and get the best of all worlds.

For details on how we can support your flight department, contact us today.

Distributed internationally by Avionics Services and DAC International.

Weighing just over 6 lbs., the compact new AirCell ST 3120 Iridium Satcom Transceiver works through your MagnaStar system to provide worldwide voice, data and information at a fraction of the cost of traditional in-flight service.
